Perfect Roses Catalogue 2024

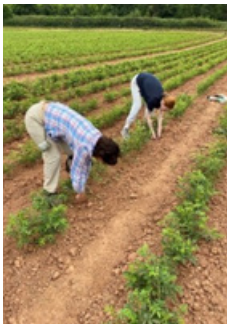

2

Welcome *Perfect Roses*

At Allensmore Nurseries we have over 50 years of experience growing and supplying ornamental plants to the best UK retailers. Using this experience to establish our rose production in Hereford has been a fascinating and exciting journey.

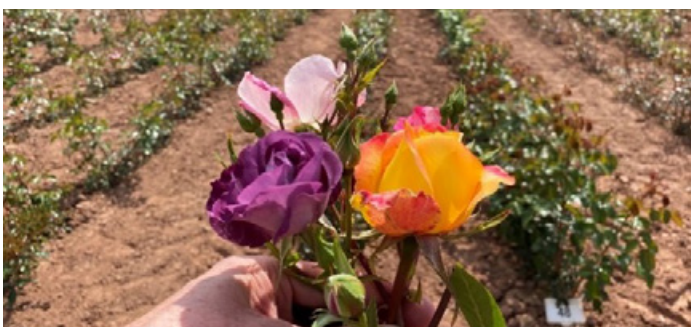

With a long farming history Herefordshire has some of the most fertile land in the country. We are delighted to be able to offer British retailers British grown roses for your customers.

Learning, recruiting and developing new skills has been one of the most rewarding aspects of our journey.

From new growth in early spring to incredible summer colour all of the team are proud to be involved with this new Allensmore crop.

Our Perfect Range

We have worked with the best breeders to select the most healthy, fragrant roses ideally suited to the gardens, patios and terraces of today's gardener. Easy to care for, ideal for the garden, grown in the UK.

Peat Free Growing Media

For some years we have been reducing the peat in our growing media and following trials we have committed to growing our rose crop entirely peat free. We are confident that growth will not be compromised and that peat free roses will establish well in the garden or in patio pots.

Sales Period

Our roses will be available for supply from January 2024 and will be available through into the summer. Our Perfect for Summer 3L roses will be available from June/July as one in colour promotional delivery.

Compact, Moderate or Vigorous?

To give customers an indication of how our roses will grow in the garden we have described them as compact, moderate or vigorous.

For shrub roses:

- Compact - less than 1.0m
- Moderate - between 1.0m and 1.2m
- Vigorous - more than 1.2m

For climbing roses:

- Compact - less than 2.0m
- Moderate - between 2.0m and 3.0m
- Vigorous - more than 3.0m

Care Cards

Making selection easy for gardeners our care cards are colour themed and indicate just what the rose is perfect for.

Some examples of care cards

Allensmore Pillars of Growth

Environment

Water recycling, sub irrigation, waste recycling, recyclable pots, biological pest control, electric vehicles, peat reduction and solar panel electricity; sustainable plant production is key to everything we do. We are continuously striving to not only reduce our impact on the planet but through our conservation projects we aim to have a positive local impact.

People

Without our people we would not have a business. Apprenticeships, training, workshops and career development are continuous areas of improvement we work on every day. Effective communication with our teams and one to one reviews with our key staff help keep everyone working together to improve range, quality and service.

Community

Supporting local charities, working with local schools, employing local people and initiating and supporting local planting schemes, community is what makes us tick.

Customers

Proud to be serving UK retailers from some of the largest to some of the smallest. Working with our customers to ensure our plants are ideal for their customers. We aim to delight gardeners and plant enthusiasts across the country.

We aim to offer Quality, Service and Value
